WHY US?

Founded in 1994, The Alternative Steel Company has become one of the foremost names in the UK's circular, square, and rectangular hollow sections structural steel stockholders' market.

With 5,000 tonnes of physical structural and architectural steel stock and quality mill support, customers enjoy an unrivalled range of products to suit most requirements. The Alternative Steel Company supplies fully certified steel at the most competitive prices in the market.

The Alternative Steel company owns and operates a transport fleet that fulfils a just in time service to most of the UK within 48 hours from receipt of customer instructions.

UNRIVALLED STOCK & SERVICE

The Alternative Steel Company is known for holding a large and comprehensive range of sizes and lengths of circular, square and rectangular hollow steel sections beyond what other stockholders carry. Coupled with a recently expanded sawing service with multiple backups, The Alternative Steel Company provides mitre-cut and straight-cut material, cut to length for the largest and smallest size requirements, just in time.

The largest mitre saw on site has a 1250mm x 700mm aperture, and the smallest size cut is just 25mm square. Standard tolerance is +0mm and -2mm, but tighter tolerances can be achieved on request.

Services also include shotblasting and primer painting, laser profiling, and kitting, and we also hold specialist sizes and lengths for bespoke jobs.

The Alternative Steel Company management and staff believe in adding lasting and significant value to customer and supplier relationships. Customers enjoy an unrivalled range of products and services, and in turn they have more options and less waste.

Our supplier relationships allow an unparalleled service for bespoke customer orders for either special lengths and sizes, or for specialist jobs.

Call us today to find out more.
